GETS HERE TO-DAY

Includes Largest Shipment of Gold. \$34,000,000, Ever Made to America.

TO BOLSTER EXCHANGE

The largest shipment of gold ever made to this country from a foreign nation will arrive here at 8 o'clock this morning. It was shipped from Great Britain by way of Halifax. The gold is valued at \$34,000,000. With it will come securities which increase the value of the shipment to \$50,000,000. The gold s British coin.

The purpose of the shipment is to holster the present low prices in sterling exchange, according to information received in high banking circles. It is not improbable that more gold and securities will follow.

This makes the total gold imports from Ottawa and London about \$170,-000,000 since January 1. Of this amount nearly \$133,000,000 has come from

According to Robert E. M. Cowie. vice-president and general manager of the American Express Company, the sold and securities were sent from Eng. land to Halifax in a fast British battleship, which was probably well guarded by a fleet of destroyers until safely out of the war zone. On its arrival in Halifax the treasure was immediately placed in the hands of the American Express Company, which stored it away n seven steel cars of heavy construction. A special engine brought the sever treasure cars to New York. No other cars were attached to the train. Every car was guarded by heavily armed mer in the employ of the express company, They did not leave the cars for a

Will Fill Twenty-five Trucks.

On its arrival in New York the treasure will be transferred to twentyfive big motor trucks, which will take under guard to the financial district. Mr. Cowie estimated last night that it would probably require an hour to load the precious freight onto the trucks and another hour to unload it after it had reached Wall street.

The gold and securities are consigned to J. P. Morgan & Co., who are acting as the fiscal and commercial agents for the British Government in this country. It is probable that the gold coin, although it is said to be British, will be stored in the vaults of the Sub-Treasury. The securi-ties will probably go into the vaults of the banking firm.

Whether the securities are American ues which have been bought in Great itain and are to be used as a basis for a credit in this country or whether consist of a portion of the new war bonds could not be learned last . It was recalled that France ed an agreement that France effected an agreement not long ago whereby she was enabled to borrow in country on the basis of French held American securities which were
